

IO-Link Hub

Remote I/O; IO-Link hub; 16 x M12 DIO channels; IP67

Communication down to the last metre. Our hub with globally standardised IO-Link technology enables bidirectional communication right down to field level. Digital sensors and actuators can therefore be conveniently integrated into the IO-Link network. The hub is also resistant to weld spatter and has IP 67 and IP 69K protection.

Преимущества

IO-Link technology allows extended diagnostics of sensors and actuators through bidirectional communication, e.g. remote maintenance of devices.

Simplified commissioning and replacement of IO-Link devices thanks to automatic configuration and plug-and-play.

Globally standardised IO-Link technology supports all common communication protocols.

The power supply is provided via the IO-Link Master and does not require separate cabling and power supply units, which saves costs.

Digital signal transmission allows the use of unscreened standard cables.

Области применения

For connecting digital sensors and actuators to an IO-Link Master.

For decentralised use at field level, outside the control cabinet.

For use with UNITRONIC® SENSOR M12 cables.

Metal housing is resistant to welding spatter.

For operating temperatures from -40 °C to +70 °C.

Характеристики

Datarate 100 Mbit/s

MTBF 3788424

Konfiguration: Web-Interface

Particularly suitable for harsh environments thanks to protection class IP 67.

Protection class IP 69 allows the use of high-pressure cleaners.

Стандарты / Сертификаты соответствия

UL 61010

Конструкция

8 x M 12 (A-coded)

1 x M 12 (A-coded)

IO-Link Hub

Материал:	Housing: zink alloy nickel-plated, silver Sealing material: FKM
Энергоснабжение:	24 V
Класс защиты:	IP 67 IP 69
Температурный диапазон:	-40 °C bis +70 °C
